Our vision

To be globally recognised as the royalty company synonymous with commodities that support a sustainable future by continuing to grow and diversify our royalty portfolio.

Our strategy

To acquire royalties and streams over low-cost mining operations and projects with strong management teams, located in well-established mining jurisdictions in the commodities required to enable the energy transition or that are produced in a more sustainable way.

What is a royalty?

A **royalty** is an agreement which provides, in exchange for an upfront payment made to the mining company, the right to receive a proportion of the revenue from a mining operation once in production without the capex or opex risk

Upfront payment 1

- Ecora Resources makes upfront payment
- Major factors impacting size of upfront payment:
 - Expected size of revenue subject to royalty
 - Percent of revenue
 - Years of operation

Periodic Royalty payments 2

- Period payment calculated as:
 - Revenue generated, less any deductions, multiplied by royalty percentage
